Rail Fans Plan Visit To Haliburton County For Festival Of Colour

Upper Canada Railway Society plans to visit Haliburton Saturday Sept. 30th for their annual Fall Colour Excursion.

One of the few still operating steam locomotives will haul the excursion train from Toronto to Lindsay. Diesel power will take over on the Lindsay Haliburton section. The group will spend about two hours in Haliburton allowing the members and visitors plenty of time to visit Sky Line Park and inspect the old Locomotive on display at the High School Park Historic Site.

The U.C.R.S. as the Society is known by its members expects to have 700 or more passengers on this very popular event which has become almost an annual excursion. The train which leaves Toronto at 8:30 proceeds to Lindsay with numerous stops at strategic points to allow camera fans to disembark while the train backs up a mile or so then with smoke and steam belching forth runs past the waiting photographers who are set up with both still and movie cameras as well as sound recording devices. It is only on such occasions that pictures and sounds of this type are possible and naturally both rail

and photo fans take full advantage.

The group will arrive back in Toronto at 8:45 P.M. and immediately prepare for a similar journey to Fort Erie Ont. Sunday morning. The Sunday trip leaves at 8:15 A.M. and using steam power all the way proceeds by various little used trackage through Hamilton to Fort Erie returning to Toronto again at 8:45 P.M.

This steam weekend allows the old and the not so old at heart a chance to relive the era of the Iron Horse for another nostalgic visit to the past.

Interested parties are invited to contact the UPPER CANADA RAILWAY SOCIETY for information on this and future trips as planned also for membership in the Society which is remarkably inexpensive. Their address is Box 122, Terminal "A" Toronto, Ont.

REGISTRATION IN FULL SWING FOR HALIBURTON SCHOOL OF FINE ARTS

The Haliburton School of Fine Arts reports registration is now in full swing for their autumn courses in landscape painting and photography. They are being congratulated on all sides for their success in obtaining such excellent instructors.

Along with the help to experienced painters, special attention will be given to those who have never used a brush before. Lack of experience should be no hindrance to anyone wishing to take the course.

The instructor for photography points out that expensive equipment is not necessary. Emphasis will be on photo composition, and the pupil will be shown how to use different light conditions to best advantage.

The school is also planning an excellent evening program to compliment the daytime classes. Lectures or films to which the public are to be invited will be shown each evening from 7:30 to 9:30 P.M. in the Recreation Hall

at Royal View Lodge. Students of the school will be granted free admission to these evening sessions. A small fee will be charged to others who attend.

The keen interest shown by so many people indicates a need for this type of a school in the area.

MINDEN HORSE WINS AT CNE

Nesbitt's Centennial Lady, owned by S.G. Nesbitt and sons of Minden took honours in the Belgian horse judging competition at the Canadian National Exhibition Wednesday.

Centennial Lady won the filly foal of 1967, the best mare under three years class, the reserve best mare for any age and the foal of 1967 owned by a resident of Ontario.

NEW TOWER FOR MINDEN C.A.T.V.

Work has commenced on the installation of a new 200 foot tower for Minden Cable TV users. This tower is being built to improve reception of channel 9 Toronto. Date of completion has not been set but October seems most likely.

THURSDAY SMILE

The only way to avoid mistakes in business is to gain experience; and the only way to gain experience is make mistakes!

COUNCIL PLANS TO DEVELOP SECOND WELL HERE IN MINDEN

The Minden Water Board in co-operation with the Ontario Water Resources Commission is planning to develop a new deep well directly behind the present pump house.

The new well, it is hoped will produce 50 gallons per minute, and the present well will be used as an auxiliary well.

The need for the new well arose, because the water system designed for 200 residential users now combining the residential and commercial users has the equivalent of 230 residential users. As well, it is an accepted fact, every water system, should have two wells, to insure an adequate supply, in the event there is a breakdown in the pumping station.

In the past the board has received complaints of low water pressure, from the Senior Citizens Home, and residential users who live on hills around the village. The present supply is inadequate, especially, in a hot and dry summer when the consumption increases at least 30 per cent over the normal summer rate.

Because, the system in the beginning operated at a loss and

now has reached the breakeven point it will be necessary to increase the consumer rates. At an estimated cost of \$14,000 a new well will be drilled developed, a small pump house constructed and work done to try and increase the output of the original well. To finance this amount over a 30 year period, plus the cost of operation it will be necessary to increase the residential rate from \$36.00 a year to \$42.50 a year. Commercial rates will be increased on a proportionate basis.

PRESTON LADY WINS SCHOOL OF FINE ARTS LUCKY DRAW

Mrs. K.C. King of 766 Queen St. Preston Ontario was the lucky winner of a pastel painting by Karl Hanke. The painting was the prize from the draw sponsored by the Haliburton School of Fine Arts. The winning ticket was number 846.

Making the draw was Roy Brohm, Warden of Haliburton County, and assisting Mr. Brohm was Mr. Glen Hodgson M.P.P.

COTTAGERS DONATE TREE AS CENTENNIAL PROJECT

On Sunday, September 3rd, at the Senior Citizens Home here in Minden, a group of cottagers from Brady's Lake gathered to present a tree to the municipality.

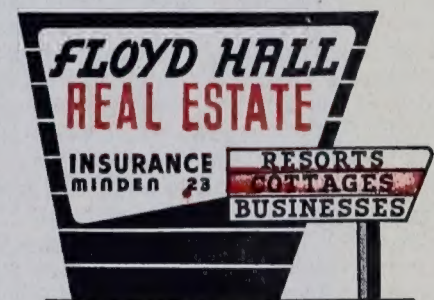

The tree, a Mountain Ash, was accepted by Reeve Brandon, on behalf of the municipality of Anson, Minden and Minden. This tree was a Centennial project of the Brady's Lake Cottagers Association, and the Home was picked as the sight of the planting.

Presenting the tree on behalf of the Association was Vice President Bill Chinnery and Secretary Mrs. Ormerod.

Mr. Jim Wade superintendent of the Home gave the cottagers a conducted tour of the home after the planting ceremony.

POT SHOTS

by FENWICK FINCH

As a result from a letter we received last week the name of the column is going to be changed. The letter came from a reader in Lindsay, who said, "Dear Fenwick, recently I got a copy of the Minden Progress and was delighted to read your column again — we miss it here in Lindsay since you stopped writing for the local papers. Just a suggestion — your title of 'Here and There' doesn't seem to be in keeping with your style. With the way you 'Pot' the tourists and they take a whack at you it would seem to me your original title in the Lindsay Press is more appropriate, 'Pot Shots' with Fenwick Finch."

* * * *

Thanks for the letter and the suggestion. The title will be changed. Shortly we'll go back to "Pot Shots". The editor has a picture of me, on my knees, with my nose to the ground looking for 'leads' to the column.

* * * *

Right now I'd appreciate a little help. Maybe one of my readers can come up with the assistance I need. In the mail and through personal contact we are told from time to time that the column as been quoted by different radio programmes but we have never heard the full particulars of the programs.

"The Padre" in Peterborough, CHEX, has quoted us several times. In Kingston, CKWS, Arthur Phelps has been kind to us. In the early fifties when I worked in Kingston three of the staff were good friends of mine. Frank Cantor of "Cantor's Canteen. Bob Carl, of the news section and "Bill" Luxton, station Manager. Bill was a student of Lorne Greene's back in the days of Lorne's newscasting and voice training efforts. Despite everything Bill tried to do for my voice, it is still rough, raspy, and I sound like a poor man's "Wally Crouter." There is a Toronto station too that I am told is very kind to us but it remains unidentified to date.

Please let me know the stations and programs if you know them. In the meantime thanks very much for noticing the column.

* * * *

Sir Sam's Inn; operated by the "Bishops" father and sons, is a highly imaginative and far-sighted operation. Looking into the future, Sir Sam's Inn has airplane, seaplane bases; Ski-tows and more to come. Constantly expanding it is following what Sir Sam Hughes advocated before the turn of the century. The Watchman Warder carried a letter Sir Sam wrote May 31st, 1899 — so timely is it, it could have been written yesterday.

In part this is what he had to say. "No part is more highly endowed by nature than Victoria and Haliburton; yet none is more undeveloped. The people are just awakening to the great value of resorts. Fully one million five hundred thousand dollars are spent in Muskoka alone. Victoria and Haliburton are unknown. — It is respectfully suggested that these scenes be utilized for the health and pleasure of the citizens of city and country, but especially for the material prosperity of the farmers, merchants, mechanics, boatmen etc. of these districts."

* * * *

So, you see, even today this letter of Sir Sam's Applies — we are still in the developing process.

* * * *

So, until next week, remember this — it's easy to spot a psychiatrist at a nudist camp. He's the guy listening instead of looking.

Fenwick

THE HOT CAR MENACE

Last year half a million North Americans had the sinking feeling that comes when you find your car isn't at the spot where you had parked it, according to the magazine National Safety News, quoted by the Ontario Safety League.

Cars are stolen from almost every conceivable place — home-garages and driveways, parking lots, public garages, and new and used car lots.

Nearly 90 percent of stolen cars are recovered by the police soon after the theft — usually in much worse condition. The average damage to a stolen car is more than \$200.00. For unrecovered cars the loss exceeds \$1,200.00. The total bill, of course, is passed on to the motoring public through higher insurance rates. But the indirect costs are even more serious. Stolen cars are often involved in other crimes and in accidents.

One of the most shocking aspects of the problem is the youth of most car thieves. More than half of them are under 18 years old. Stealing a car is often a first offence for young people and frequently it starts them in a career of crime.

Auto thefts also create serious traffic hazards. If the thief is not a skillful driver, he is obviously a menace. Worse he may be less skillful than he thinks he is. Also, he may be unfamiliar with the model or the condition of the car he has taken. More than 25% of stolen cars are involved in accidents.

Increasing the hazard is the fact that the thief has no financial interest in the car and isn't likely to drive with the normal caution of the owner. If the thief crashes, he may leave the car — if he is able to get away. Perhaps he'll steal another.

Finally, the thief knows that he and the car are hot. If he encounters a police car, he may try for a fast getaway, with a high-speed chase that may bring death or injury to himself and innocent people.

BRAIN POISON

"There is now overwhelming evidence the schizophrenics are victims of a subtle brain poison" says Dr. Abram Hoffer, psychiatrist of University Hospital, Saskatoon. This yet-known agent "produces the bizarre psychological changes in perception, thought, mood, personality and behavior so common to the disease." The aims of the American Schizophrenic Foundation, founded in 1966 is to identify the brain poison or poisons and to develop new ideas, new methods, new treatments of this widespread mental ailment.

WHO KNOWS ? ?

Who knows who is going to be the next leader of the Conservative Party? For that matter who knows who all the candidates will be — John Diefenbaker (the Chief) could very well be there.

Some say he won't run, others think he might, remember this he has lived with a certain set of ideals for years, and our feeling is, if he thinks they might be changed or tilted in a wrong direction, he just might throw his name in the hat.

Some say he will bow out gently and graciously — we say if there is a fight at stake Dief will be there. Win, Lose or draw, Dief has always fought, and we can't see him doing things different now.

The man most responsible for the shake up in the Conservative Party is president, Dalton Camp — he saw the hand writing on the wall, and knew a move must be made. After many months of well thought out plotting, it is all arranged, the big step will be taken this coming week-end. Some still have in the back of their minds that maybe the Chief will be back to haunt them once again — if he does he just might split the party. This would allow the Liberals to sweep up the pieces, and store them away for some time to come.

The massive coverage of this weeks Conservative convention by press, radio and TV is more than an unprecedented triumph for the media. A politician today has to be more than a walking prophet of political affairs — he must have the appeal of the voters, both from a physical and speech source of identity. People today regardless of locality, come to know the political leaders by looks and sound — even in living colour. Reporters, photographers, from all medias from coast to coast will be on hand for full reports and details. It is going to be that interesting, that the excitement is luring this writer down to Maple Leaf Gardens to take in all the action.

In the TV age, the people demand visible democracy in the same breath that they call for participatory democracy. Whoever is chosen Conservative leader next Saturday will have to play by a new set of rules, both major parties are facing demands for regular national conventions at which the main item of business will be an assessment of the leader's performance and a decision by the delegates as to whether he should continue in power. The New Democrats already have such machinery.

It is like a horse race — this convention, as of now there are favorites, some good chances for others and of course there are a couple of dark horses. Not a living soul knows or can safely guess at the outcome. But, by noon on Saturday we shall all know, and with the coverage given, everyone will know at the same time, through a vast news media, which is the most extensive ever.

Just for interest sake, we are going out on the limb and predicting the Hon. George Hees, all the way.

LETTERS TO THE EDITOR

Aug. 31, 1967

The Editor:

We wish to comment on the front page article in which the "Haliburton Highlands Property Owners Council" denounced fishing. Every charge that they made against ice-fishing can be easily disputed.

First of all, they stated "the people who come in to ice fish do not spend a nickel with the operators" They are right — they don't spend a nickel, they spend hundreds of dollars. The fishermen buy gasoline, minnows, cigarettes, accommodation, food, and sometimes even snowmobiles and fish-huts. Many resorts (lodges, motels and general stores) would be closed in the winter if it were not for the winter fishing industry. Private huts and rented huts bring winter tourists into the area. They even prompt winter tourists to return in the summer — increasing the summer tourist trade.

Secondly, how do the fish-huts pollute the lakes? Certainly the small amount of litter created by the ice-huts cannot pollute Haliburton's lakes. Our game wardens patrol the lakes sufficiently in the winter-time. Certainly they would close any hut with an excess of debris lying around and in a hut. Do the huts pollute the lakes as much as gas and oil from motorboats, faulty septic tanks and summer litter? Anyway, the vast majority of fishermen are responsible citizens, appreciative of the good fishing facilities Haliburton has to offer. They take their garbage off the lakes because they know that pollution of a great extent will harm the fishing. The percentage of garbage in the winter is extremely low to that in the summer. So how can the Council blame "pollution" on solely the winter fishermen?

Next, the Council said that the fisherman were burning up wood. They were not specific. Who's wood? Many local people have a small winter business selling wood to the fisherman. If more of these businesses were set up the problem would be non-existent.

Boshkung Lake, the largest fish hut lake, has little problem with litterbugs, pollutionists and penny-pinchers. Every winter business operator on Boshkung is benefiting from the money and publicity fishermen have given Haliburton. Some business operators even went all over Boshkung when the ice huts were off and checked and picked up litter that some of the huts might have left behind them. Maybe control and concern such as this is what may be lacking in other lakes. They can kindly take example

from Boshkung.

To conclude the winter business of ice-fishing is as much a part of Haliburton County as the summer tourist trade. To banish the ice-fishing, that this County fought so hard to obtain some years ago, would take away a major source of winter tourists, and hence, income.

The Haliburton Highlands Property Owners Council should greatly consider the harm they could do if they pursued this matter. They would be destroying the development of a balanced, year-round tourist cycle that Haliburton County has been trying so hard to obtain.

Yours truly,

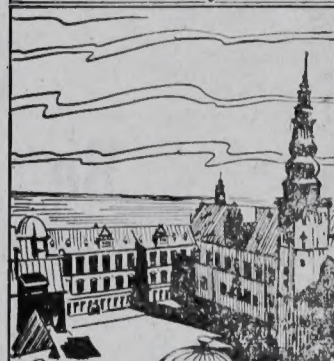

Fred Olan,

Stanly Archer,

Ali Willis.

ANNOUNCEMENT

The Women's Institute of Minden have been invited by the Lakeview ladies to come to their meeting on Sept. 14 at 2:30 p.m. Would ladies here please phone 221W so we can arrange for cars.

Mr. and Mrs. Ed Lyle, Kinmount will be at home to their friends and neighbours on Sunday, Sept. 17th from 2 to 4 and 7 to 9 p.m. on the occasion of their 50th wedding anniversary. Best wishes only.

HUNTING LICENCE EXAMINATION PROGRAM

After December 31, 1967, all hunters purchasing a licence, for the first time will be required to pass an examination before a hunting licence may be issued. Standard examinations will be provided only by Department of Lands and Forests Conservation Officers, appointed as examiners.

A "certificate of competence" issued by a hunter safety training instructor will be sufficient to obtain a licence until the end of this year. The Department recommends that all new hunters take such a course before asking for examination.

The examination containing both written and practical tests requires knowledge of firearms, safe hunting, game laws, and ability to handle firearms safely. The fee is \$3.00 for examination, or reexamination.

Applicants must be 15 years of age or over. Those failing to pass the written test will not be permitted to take the practical test. They will be directed to a qualified instructor for more intensive training before re-applying for an examination.

Hall's Lake News

Thanks to Mrs. Rose Davies, and to Mrs. Louise Watson for helping her compile this article: "Some reflections on Hall's Lake"

This is just a wee bit of the doings around Hall's Lake from 1877 to 1967, as I remember them.

That is a pretty good life time, and I have seen many changes.

Hall's Lake is about the loveliest lake in Haliburton County, and is very popular with summer visitors. It is almost round and about two and a half miles across in any direction. Not a big lake, perhaps, but what it lacks in size it makes up for in beauty.

Its waters sparkle in the summer sun, reflecting the blue of the sky. In Autumn the beautiful colours of the maples and white birches which grow along its shores are mirrored in the water. It has some rocky shores, and you can see bits of mica shining in the rocks, but it also has many beautiful beaches that cannot be beat.

As a child, how I loved to paddle around in that clear, pure, water, and run barefoot along the sand. I soon learned to row a boat, paddle a canoe, then later to catch the lovely pink salmon trout which abound in the Lake. They were very plentiful then, and a man could go out any morning and in a few minutes bring home a beauty for breakfast.

These were the jays of my childhood.

My dad was one of the first settlers around the Lake. He put in his first crop in fresh cleared land with a hoe — seven acres of it. That was ninety years ago. Could our up-to-date men do that much nowadays? I think not.

There is a great deal of credit coming to the pioneers who who cleared a farm out of the forest, built a house and supported a large family. There were no they were real men with muscle and brains, and a respect for one another. If a man was sick or unable to do a job alone he could always depend on the help of his friendly neighbours.

Communication was hard in those days. We had to walk four miles to the Post Office, but we had a jolly old Irishman who used to go to Minden once a week with a horse and wagon for the mail. He did this for many years, but when it got too much for him an Englishman took over, and he came right to Hall's Lake. That was better. We had a Post Office for a few years, but we were due for another change. Now we have our mail box and a daily mail delivery. Yes, I sure have seen many changes in my day.

When I went to school I had to walk four miles. Now they take white-collar jobs for them, but the children in a bus about

twenty-four miles. I wonder, sometimes, if that is progress. When I see the wee ones start out before daylight and come home after dark in the short, cold days, I wonder again.

There used to be two saw-mills on the Lake, but they are long since gone, and in their place are summer cottages all fitted up with the latest gadgets and conveniences.

When I was young we had to make our own entertainment. Our pleasures were in simple things, but we had a happy home life. Now, of course, we have Radio and T.V., and this is a tremendous change.

I did enjoy seeing our Queen on the T.V. recently. When I was a child it was Queen Victoria. I don't think she ever left the British Isles.

I remember a cute story of the Queen visiting Scotland. She used to love to go for long walks. She would dress as a peasant and folks didn't know her. On one of her jaunts it came on raining, so she went into a cottage but didn't make herself known. The rain didn't stop but she had to leave. The hostess said "I will get you an umbrella", of which she had two. So she gave the Queen the old one. The next day a boy came to the door bringing her a new one with thanks from the Queen. I thought of it when I saw our Queen with her Umbrella, and as she got on the plane to go home. Old times and new!

There are lots of things yet to be desired, but one thing is certain — you don't really miss what you never had!

Please!
Only you
can prevent
forest fires

INDIANS TO SEE OUR COUNTRY

Thirty-five students from the Yukon and Northern B.C. interior will see Canada from coast to coast in October because a food company believes that in Canada's centennial year Canadian business should give more consideration to the first Canadians.

The students, aged 14 to 18, will be flown from Whitehorse to Vancouver and then set out on a three-week "see-enjoy Canada" journey with stops in Vancouver, Toronto, Ottawa, Montreal and Halifax.

Their sponsor is the Independent Grocers Alliance. The program is being conducted in co-operation with the Department of Indian Affairs and Northern Development and the Canadian Centennial Commission.

The project has been undertaken, according to Ray D. Wolfe, President of IGA Canada Limited, because "in the excitement of celebrating our first 100 years as a nation, most Canadians have tended to overlook the original occupants of the country."

"In fact, since most Indians live far from the major centres of population, it is too easy to forget about their existence all together, and that Indian youth is perhaps Canada's greatest untapped resource," he said.

"Too often we think of people in stereotypes," he continued. "The new generation of Indians no longer can or should be stereotyped. Through focusing attention on this bright group of high schoolers from the north-west, we hope that Canadian business and industry will be reminded that in thinking of Canadian people in terms of employment opportunities the Canadian

Indian should not be forgotten. "Moreover," he added, "We hope participation in this kind of a centennial project will leave an indelible mark on the young people taking part — one that won't be forgotten after centennial year has passed."

The students will spend three and a half days at Expo, tour the naval base at Halifax, an air force station in Ottawa, a ranch in Manitoba, oil wells near Edmonton, TV studios, a newspaper office, department stores, planetarium, university, the mint, national museum, historical centres and many points of interest including Niagara Falls. A highlight of the trip will be a tour of parliament hill and a private meeting with the Prime Minister and Minister of Indian Affairs and Northern Development.

They will see an NHL game at the Montreal Forum and visit with the Toronto Maple Leafs at a Toronto hockey practice. In several cities, meetings with teenagers have been arranged, both for social and discussion purposes.

Mr. Wolfe said, "the program was designed to give the students full opportunity to meet a broad cross-section of Canadian people including the various ethnic groups which now make up our citizenry as well as to eat the groups have introduced to Canadian different kinds of food that these add."

The 35 students — 19 boys and 6 girls — were selected on the basis of leadership qualities and scholastic ability by supervisors of the two hostels in which they live while attending Whitehorse High School.

CLARKE - BROWN WEDDING

St. Patrick's Roman Catholic Church at Kinmount was beautifully decorated with white 'mums on Saturday, Aug. 5, 1967 for the marriage of Miss Gloria Jean Brown and Mr. John Herbert Clarke of Minden Ontario.

Gloria is the youngest daughter of Mr. and Mrs. George H. Brown of Kinmount, and John the son of Mr. and Mrs. Patrick C. Clarke of Minden.

Rev. C.R. Kay officiated at the marriage, and the organist was Miss Judy Walker of Bobcaygeon, Ont.

Given in marriage by her father, the bride looked lovely in a white gown. The long bouffant skirt worn over a hooped crinoline was of silk organza trimmed with panels of old English lace. The bodice, of old English lace, had a semi-scooped neckline with lily point sleeves. Her head-dress of fabric white roses held her full chapel veil.

The bride carried a white pearl prayer book enhanced with satin streamers and red rose buds and lily of the valley.

The matron of honour was Mrs. Barbara Meagher, sister of the bride from Oshawa, Ont. The bridesmaid was Mrs. Bernice Barton from Oakville. The attendants wore identical gowns of nylon sheer over aqua satin. Their headresses were crowns of the same material. They carried bouquets of shast daisies and yellow 'mums.

Mr. William Barton from Oakville was best man and Ron Burgess and Charles Mavety from Toronto were ushers.

The reception was held in the Legion Hall in Kinmount. The bride's mother received wearing a cerise chiffon gown with white accessories. She wore a corsage of white rose buds. The bridegroom's mother assisted wearing a two piece ensemble of blue lace with three-quarter length coat of blue shantung. Her corsage was of white roses on silver leaves and ribbon.

The happy couple left for a honeymoon to Sydney Nova Scotia and eastern provinces.

For travelling the bride wore a yellow sheath dress of lace over taffeta, with matching accessories, and she wore a corsage of bronze roses.

The newlyweds will reside at 26 Coates Ave. Toronto.

Guests present were from Oakville, Toronto, Scarborough, Montreal, Whitby, Oshawa, Lindsay, West Hill, Minden, Peterborough, and Kinmount.

What's It All About?

by REV. JIM

A LOOK AT DRINKING

Mark 16:18 — "and if they drink any deadly thing, it shall not hurt them."

THE PROBLEM OF ALCOHOL

We do not need facts and figures to tell us of the problem of alcohol, most of us know that it is a problem because we have first hand information. We know homes that have gone without food, men, who have lost their jobs; seperated couples; sickness and disease, all because of drink.

I too know that excessive drinking is a destructive force. But what I am not sure about is the cure. Should we talk total abstinence or individual responsibility? I favour the latter.

SETTING AN EXAMPLE

Some people believe that as a minister I should set an example by not drinking. Of course these people believe in total abstinence. I set an example by not drinking for a number of years but very few, if any followed my example. This is the way it is to-day! Drinking seems to be here to stay. And more and more people are indulging. Total abstinence evidently will not work. It fails to persuade.

It could be argued that we teach, preach and set an example against the use of alcohol. We should slow the destructive force of it so as to discourage anyone contemplating the starting of it. We have done this and we are doing it but either our method of approach is wrong, or nobody is listening, or at least very few.

Perhaps what we should teach and preach and set an example is the proper use of alcohol.

THE PROPER USE OF ALCOHOL

First — We should realize that some people can not handle this beverage. They are what is known as alcoholics. An alcoholic will gladly admit that for him alcohol is a destructive force. Attend an A-A meeting sometime and listen to their stories. You will soon understand why they say "I can not take that first drink."

Second — The alcoholic does not say that others can not handle this beverage. They know that some can. Our worry then is, "who is the potential alcoholic? (I would be interested to hear from some alcoholics on this question because I offer my mind: First: It would seem to me anyone who needs to get drunk to have a better time at a social gathering could be a potential alcoholic. Such a person is not free from himself. But what he should know is alcohol does not free him. It merely numbs the senses, and he will require more and more as he goes along. Second: Anyone who uses alcohol to escape the problems of life is a potential alcoholic. He is using the beverage as an escape. But he in fact is adding to his problems. Now as I said "I speak as an amateur." I would like to hear more on this question from an alcoholic himself.

THE CURE FOR THE POTENTIAL ALCOHOLIC

A-A has done a tremendous work for confirmed alcoholics. We would be interested in hearing some personal testimonies from A-A members. But what about the potential alcoholic? Is it enough to say "don't drink?" Perhaps there is a more excellent way. Eliminate the cause! If the cause is to force oneself. Then let us learn such freedom. If it is problems we have, let us find a better way of handling them. I say go to church. Not to hear messages on abstinence, but how Christ sets us free, and gives us strength to handle problems.

* * * *

This Sunday at the Minden United Church we hold our annual Rally Day. Following the service there will be a congregational picnic. All families are invited to come.

WAR PENSIONS FOGOTTEN IN CENTENNIAL YEAR: LEGION

The Royal Canadian Legion is being forced to the conclusion that the government has apparently forgotten its responsibility to the war disabled and the dependents of the dead.

Deploing the seemingly insensitive disregard of the federal government for the rights of disability pensioners and dependents, the Legion, in a letter to Prime Minister Pearson, expressed great disappointment that no action on pension increases was announced at a recent press conference which previewed the business of the next parliament.

"It is highly regrettable that this seemingly insensitive attitude of the Federal Government does not enable the war disabled and dependents of those who died to share fully in the glories of our Centennial Year," said Legion National President on MacBeath of Moncton.

On four previous occasions the Legion has set out its views on this matter in the form of briefs. In 1920 a full disability pension was equated to a very basic civil service salary. Today the civil servant in question receives \$1,392 a year more than the pensioner.

The Legion letter followed years of submissions on the need for a more equitable and basic formula to cover pension rates.

A stop-gap pension increase was made in September, 1966, but this did not apply to wives and children.

HEALTH TIPS

It's amazing how many people have a garage man investigate every squeak or knock in their cars, but who let years go by without ever getting a medical checkup to see if all is well with their very own human machine. Now is this sensible? It is easier to get spare parts for a motor or a man? Can a fellow turn himself in on a new model? Never mind answering. We know the answer.

During the last ten years there have been 25 epidemics or tuberculosis in Canada — usually involving one or more adults and from 15 to 35 children. The starting point of such an epidemic is one person with unrecognized tuberculosis who did not have a medical checkup, including a chest x-ray. This person infected one or more others who in turn spread the infection through the community. It takes only one undetected active case to start an epidemic.

"As long as I have breath in me" people say. And how long is that? Well, it would have been longer for quite a few people if they had taken the advice of the Haliburton County Tuberculosis & Health Association and had periodic medical checkups including a chest x-ray?

Walter Safety says,
"Think, don't sink!
Be water wise!
Learn and practise
water safety every day.
If you're ever in
trouble in the water,
call for help."

NOTICE

TOWNSHIP OF ANSON, HINDON & MINDEN

At the request of the Council of the Township of Anson, Hindon & Minden, the Ontario Water Resources Commission has investigated the possibility of installing within the said Township a water works project and now proposes to construct such works at an estimated cost of \$14,000. The Township proposes to borrow this sum from the Ontario Water Resources Commission and to make repayment over a period of thirty years.

The proposed project would consist of the following works:

The construction of an auxiliary well pumping chamber to serve the community of Minden to be located adjacent to the existing well pumphouse on the east side of Bobcaygeon Road, approximately 440 feet north of North Water Street.

The estimated annual cost of the project is \$1,752 which includes debt retirement, interest, reserve for contingencies and operating costs.

It is proposed to raise this sum by increasing the unit flat rate from \$12.00 to \$14.50. The present domestic flat rate for a typical home is \$36.00 which is equivalent to 3 units at \$12.00. This will be increased by 7.50 (3 units at \$2.50) to \$43.50

Annual Charges For A Typical Home

	Present	Proposed
80' frontage at 23½ cents	\$17.20	\$17.20
Connection charge	5.25	5.25
Consumer flat rate (3 units)	36.00	43.50
	<u>\$58.45</u>	<u>\$65.95</u>

Any ratepayer may, within twenty-one days after the first publication of this notice, send by prepaid post to the Clerk of the Township of Anson, Hindon & Minden, at the address given below, a notice in writing stating his objection to such approval or to the imposition of the special rate.

The Ontario Municipal Board may approve the said special rate pursuant to the statute and may approve of the said works, but before doing so it may appoint a time and place for a public hearing when any objections will be considered, but notice of such hearing will be given only to those persons who have given notice of objection as provided for above.

All plans, reports and estimates may be inspected at the office of the undersigned during business hours.

DATED AT MINDEN and first published this 7th day of Sept. 1967.

G. B. Bibby
Clerk-Treasurer,
Township of Anson, Hindon & Minden,
MINDEN, Ontario.

WOODS, WATERS AND WILDLIFE

By James Woodford

Canada's "sheep-cow" joins the ranks of the African elephant and the Siberian tiger as a big-game trophy animal next year.

The Northwest Territories Council announced recently that it would issue 32 hunting permits for \$4,000 apiece, to gun down the inoffensive and placid muskoxen.

Hunting the "sheep-cow" will be as exciting as shooting a barn-yard cow. "The only skill required," said one game expert, "is to select the biggest one."

Included in the announcement

was the usual clicke that this was being done to bring more revenue to the Eskimos. As far as this writer is aware there is no Eskimo Airways and no Eskimo Hilton Hotel — so how much of the \$4,000 will end up in the pockets of the Eskimos?

When the first explorers reached the Canadian north, they found bands of muskoxen distributed over most of the continental barrens and Arctic islands. Since then, their numbers have been greatly reduced, and the Canadian Government found it necessary to declare a continued

close season in an attempt to preserve the species from total extinction.

Now, a political, rather than biological, decision will again subject the muskoxen to exploitation. Thirty-two in 1968, but how many in '69 or '70 or ... ?

The Federation of Ontario Naturalists believes that Canada, the western world's most affluent country can surely afford to allow one or two species of mammal to live in our great country in peace. More than just the muskoxen is at stake — this is a measure of our civilization. We deplore the slaughter of animals in Africa and South America, but too often not at home. We must set an example for the rest of the world — let the muskoxen alone; let the trophy hunters go elsewhere.

Walter Safety says, "Avoid playing with air-inflated toys and inner tubes in the water. Keep them on the beach where they belong."

LARGE FORESTRY CLASS TO ATTEND

SIR SANDFORD FLEMING CAMPUS

The supply of forestry technicians in Ontario will double this year when between 150 and 200 students are enrolled in a forestry Technical Program which will get under way at the Sir Sandford Fleming College of Applied Arts and Technology in the Lindsay-Peterborough area during the coming academic year.

Organization of this educational program was announced today by Rev. H.J. Maloney of Bancroft, Chairman of the Board of Governors of the Sir Sandford Fleming Loyalist College.

The Hon. Rene Brunelle, Minister of Lands and Forests requested that the Board offer the program, since the rapidly expanding needs of both the forest-based industry and the government service have created skill shortages at the Forestry Technician level. He felt these shortages could get worse unless action were prompt-

ly taken.

Father Maloney said that the Sir Sandford Fleming-Loyalist Board was approached because it was the nearest community college to the Department of Lands and Forests' Forest Technical School of Dorset and could most readily benefit from Dorset school's experience and resources.

The arrangement reached between the Department of Lands and Forests and the College Board has been approved by the Hon. William G. Davis, Minister of Education. Under the arrangement, the Department of Lands and Forests will lend instructors for all technical forestry subjects. College instructors will teach such general subjects as English, accounting, surveying and drafting.

Forest Technical School director R.W. Hummel of the Department of Lands and Forests and Sir Sandford Fleming President D.B. Sutherland have informed the more than 400 students who have applied to the Dorset school that they will be given a choice between starting the course in October at Sir Sandford Fleming College or in January at the Department of Lands and Forests school in Dorset.

Graduates of the one year forestry technical program are sought by both provincial and federal governments as well as by forest industries.

"Trained people in forestry are very scarce", Mr. Brunelle said today in Toronto. "If this pilot project is as successful as we expect, it is our hope that other community colleges established in Northern Ontario will be able to participate in the education of forestry technicians."

President Sutherland announced that negotiations for housing the forestry technical program in Lindsay, regional headquarters for the Department of Lands and Forests, were almost complete. "The Hon. Leslie Frost, who is a member of our Board of Governors has been instrumental in finding excellent accommodation in Lindsay. We are delighted that the College has obtained outstanding temporary accommodation for its courses in both Lindsay and Peterborough. The forest technical program will give a unique flavour to the Sir Sandford Fleming Campus. Both the Board of Governors and the Faculty are excited and enthusiastic about the future possibilities of this program."

BOOKBAGS BOW BACKS

School books can ruin posture. Two physicians in Cologne, Germany point out that a youngster's posture may be caused by the way he carries his books.

Five to 15 pounds of books stuffed into a briefcase and held in the same hand all the time may eventually cause the shoulder on that side to slip lower down than the other side and may cause the spine to deviate from its normal position.

What to do about it? Carry books in a napsack or divide books into two piles, carrying approximately the same weight in each hand.
